

URB-1 IMPROVED

An enhanced universal battery for small and medium-class UAVs, optimized for high-energy consumption flights (e.g., cameras, communication, or heating). It provides reliable power without voltage drops and integrates easily into the UAV structure.

24 000 mAh

75 x 95 x 136 mm

1800 g

URB-3R

High-capacity battery for UAVs with long-duration or energy-intensive tasks, such as long flights, HD video transmission, and multi-channel communication. Resistant to deep discharges and overheating, ideal for medium and heavy platforms.

72 000 mAh

78 x 134 x 267 mm

5500 g

LE BATTERY

A powerful next-generation battery for drones with high energy demands. Features built-in status monitoring, overvoltage protection, fast charging, and remote control. Built for tough conditions where autonomy, control, and reliability are essential.

108 000 mAh

110 x 115 x 377 mm
